Shamal Wassana
Graduate Software Engineering

I am a recent Software Engineering graduate with a passion for creating innovative solutions. My education provided a strong foundation in software development and problem-solving. Through hands-on projects and coursework, I honed my skills in programming and teamwork. I am eager to apply my knowledge and adapt to new challenges in a dynamic work environment. I am now seeking an opportunity to launch my career as a software developer and contribute to cutting-edge projects.

Key Skills

- Proficient in programming languages such as JAVA, HTML, CSS, and JAVASCRIPT.

- Strong problem-solving abilities, with experience in debugging and troubleshooting.

- Familiarity with software development tools, including IDEs, versioning control (Git), and issue tracking systems.

- Knowledge of software engineering principles, algorithms, and data structures.

- Excellent communication skills, both written and verbal.

- Quick learner with a strong desire to adapt and work with emerging technologies.

- Adept at working collaboratively in a team-oriented environment.

Projects

Mygaraj.lk

"Mygaraj.lk is a cutting-edge ecommerce platform dedicated to automotive enthusiasts and vehicle owners. Specializing in providing a seamless online shopping experience, the platform offers a vast selection of high-quality auto parts and accessories. Whether customers are searching for specific car components or looking to enhance their vehicle's performance and aesthetics, Mygaraj.lk caters to all automotive needs. With user-friendly navigation, secure transactions, and swift delivery services, Mygaraj.lk stands as the ultimate destination for car enthusiasts, ensuring a hassle-free and reliable way to find and purchase the right parts for their vehicles."
For this, I used Java as the language. frontend design HTML, CSS and JavaScript. this is a web application, Netbeans IDE as the tool and MySQL as the database.

Human Resource Information System

An HRIS, or human resources information system, is a suite of software applications used to manage human resources and related processes . Through this HR system HR users can do new employees registrations, they can up date their attendance & employees also can update their attendance. Only HR users can update & change the details in HRIS. Employees can search their   attendance & they can up date attendance records to HRIS. Only attendance section have authorization for employees.
For this, I used Java as the language. this is a standalone software application, Netbeans IDE as the tool and MySQL as the database.

Hobbies

Playing Cricket, Playing badminton, Coding, listening Music

Additional activities

- School Prefects Association - Senior prefect
- School western band
- Church media unity -Camera & Sounds handling

○ **Car wash guide android application**

"Introducing the ultimate Car Wash Guide, your go-to Android application for locating car wash centers nationwide. Our app provides a hassle-free way to discover and visit car wash facilities, ensuring your vehicle receives top-notch care. With a user-friendly interface and comprehensive database, finding the nearest car wash center is just a tap away. Experience convenience and cleanliness on the go with our Car Wash Guide app, your trusted companion for maintaining your vehicle's shine and hygiene."

For this, I used Java as the language. this is a android application, InteliJ IDE as the tool and Firebase as the database.
